Cinetica

WAVES MODULAR WALL COVERING

\$130

DESCRIPTION

Part of the Cinetica Collection designed by Studio Lido and crafted by Marinoni Peltro, this wall covering module will add character and a highly dramatic look to a large interior, loft, or commercial space. Crafted of high-quality pewter (95% tin, 4.5% antimony and 0.5% copper) with a polished finish, this module is fashioned in the shape of a prismatic triangle with grooved sides that create an optical illusion of movement. The modules can be assembled in any size to divide and define the space of a large room, adding brightness and captivating light effects.
