## WHITE AND GOLD BRUCO RAMPANTE SCULPTURE

\$480

### DESCRIPTION

Inspired by the shape of a rampant caterpillar ("bruco rampante" in Italian), this original ceramic sculpture is crafted using molds with each section assembled and decorated by hand with a glossy white glaze and gold details. The curved silhouette features three staggered rows of six trumpet-shaped feet that add a dynamic quality and allow to position the piece both horizontally or vertically. Part of the Pluvianimali Collection, each piece is entirely unique and small differences from the pictured item are to be expected.
