WHITE AND SILVER BRUCO RAMPANTE SCULPTURE

\$480

DESCRIPTION

Part of the Pluvianimali Collection, this sculpture is inspired by the shape of a caterpillar ("bruco" in Italian). Entirely handcrafted of ceramic, the curved shape features three staggered rows of six silver-finished, trumpet-shaped protrusions. The dynamic silhouette can be placed both horizontally or vertically, and the hollow sections can host flowers or other objects to create an unconventional, artistic display. Due to its handcrafted nature, small differences in size are to be expected.
