WOOD DINING TABLE

\$5,190

### DESCRIPTION

Introduced at the Fuorisalone event during 2018 Milan Design Week, this table is made of MDF with blue-stained eucalyptus veneer and has a sleek silhouette that recalls the proportions of the iconic Italian "fratino" (rectory table) with a long and narrow top and straight legs. Simple and austere, the remarkable feature of this piece is its construction: four lateral elements and the top are assembled without additional parts to create a structure that has the sculpted look of a solid block. With its versatile design, this piece can be used as dining table, work desk, or console in any decor.
