## XY&Z TRIANGULAR COFFEE TABLE

\$4,180

### DESCRIPTION

This striking coffee table is part of the XY&Z series and can be paired with other exquisite pieces to create a dynamic and contemporary living room or study. This piece combines rods of steel that create a triangular structure supporting the triangular top, which also creates another triangle by folding on itself at a 90-degree angle. The top is in Supermirror, a very strong surface that won't shatter like regular mirror, while being highly reflective.
